Proficient

## CERTIFICATIONS

- **Salesforce Certified Platform Foundations – Salesforce**
- The Complete Salesforce Development Course – 2024 Updates
- Participation and 4th place in INIC – UNIVAP
- Participation in the 13th Junior Programming Marathon – 2024
- Data analysis in Excel
- Participation in ONHB 2024

## PROFESSIONAL EXPERIENCE

**Developer** 04/2024 – 11/2024  
**Casa de Repouso Amor Eterno – São José dos Campos, SP**

- Developed a fully customized management system based on specific requirements from the clinic owner.
- Designed and implemented a relational database using SQL.
- Built the web interface using HTML, CSS, JavaScript, PHP, and Git.
- Implemented CRUD operations, enabling patient, doctor, and staff registration and consultation processes to be completed up to 60% faster compared to manual methods.
- Improved internal management efficiency by 35%.
- Developed an automated inventory control system, optimizing internal processes and reducing operational errors by over 50%.

## EDUCATION

**Web Developer Diploma: TI** 04/2025 – 10/2025  
**Tamwood International College – Vancouver**

**Status** – In progress

The program includes 6 months of academic study and 6 months of internship in the field. I've had the opportunity to develop dynamic and responsive websites, integrate RESTful APIs, and apply agile methodologies such as Scrum. I also gained hands-on experience in advanced front-end projects using HTML, CSS, and frameworks like Bootstrap and Tailwind, along with JavaScript and React. Back-end technologies such as Node.js and Express.js, databases like MySQL and MongoDB, content management systems (WordPress), and programming with Python and Django were also covered.

**Technical High School: IT** 01/2022 – 12/2024  
**Colégios UNIVAP, Unidade Centro – São José dos Campos – Brazil**

**Status** – Concluded

I gained experience in projects involving software development, database management, web programming, computer graphics, computer networks, and object-oriented programming.

Additionally, the projects were developed in teams of three, which helped me improve not only technical skills but also my ability to propose innovative solutions, collaborate effectively, and solve problems. Over the 3-year period, I participated in programming competitions and achieved 4th place in the INIC. I also presented projects at technical fairs, sharing our work with

---

## TECHNICAL SKILLS

### Web Development:

- HTML5, CSS3, JavaScript, Python, Node.js, PHP
- React, Vue.js e Django
- REST APIs, Responsiveness, UI/UX Best Practices
- Tailwind CSS, Bootstrap
- MySQL, MongoDB, SOQL
- WordPress

### Salesforce Development:

- Apex Programming (Classes, Triggers, Async Apex: Batch, Queueable, Schedule, Future Methods)
- Aura Framework, SLDS, Data handling and application architecture in Salesforce
- SOQL, DML, Apex Governor Limits, Order of Execution, Code Bulkification
- Apex Unit Testing, Exception Handling
- Application Architecture, MVC Pattern

### Tools & Frameworks:

- Salesforce CLI, Visual Studio Code
- Git, GitHub
- Notion, Jira

### Agile Methodologies:

- Working knowledge of Scrum and rituals (Daily, Planning, Review, Retrospective)
- Team collaboration in agile environments using Jira and Notion

the academic and professional community.

## SALESFORCE

### Complete Salesforce Development Course

*SFDCFacts Academy (Udemy) – Instructor: Manish Choudhari (Amazon, ex-Google, ex-Salesforce)*

Advanced course focused on preparation for Platform Developer I and II certifications, with over 15 hands-on projects, including 2 advanced projects. Topics covered:

- Apex programming: logic, triggers, automations, exception handling, unit testing
- Asynchronous Apex: Batch Apex, Queueable Apex, Scheduled Apex, Future Methods
- Data manipulation using SOQL and DML
- Lightning Web Components (LWC) and Aura Framework
- Salesforce Lightning Design System (SLDS)
- Flow Builder, formulas, and validation rules
- Object modeling and customization
- Code Bulkification, Order of Execution, and Governor Limits
- Web application architecture on the Salesforce platform

### Trailhead:

Trailhead Profile:

<https://www.salesforce.com/trailblazer/matheusverissimogonzalez>  
+30 badges | **25.000+** points | Level: *Mountaineer*

### Completed trails:

- Developer Beginner, Build Apex Coding Skills, Flow Builder...
- Ongoing development focused on Apex, SOQL, LWC, and automation

### AgentBlazer (in progress):

- Hands-on experience with Einstein and Agentforce
- Development of intelligent agents focused on data-driven automation

---

## MAIN PROJECTS

- **Word Shuffle**  
(Apex, LWC)
- **Retail Dashboard**  
(HTML, CSS, JS, Node.js + Express)
- **CryptoDashboard**  
(React, Node.js, Express, and CoinGecko API, CSS)
- **CMS Car Deals**  
(HTML, CSS, PHP, PhpMyAdmin)
- **Portfolio**  
(HTML, CSS, JS)
